

IPL DASHBOARD PROJECT

Project Overview

This project is an interactive IPL Dashboard built using Python, Streamlit, Pandas, and Plotly. The dashboard analyzes IPL match data and provides insights through interactive visualizations and filters.

Features

- Dataset Overview
- Data Cleaning
- Key Performance Indicators (KPIs)
- Interactive Filters
- Winning Team Analysis
- Toss Decision Analysis
- Data Visualization using Plotly

Technologies Used

- Python
- Pandas
- NumPy
- Plotly
- Streamlit

Dataset

- IPL Matches Dataset (CSV format)

Visualizations Included

- Winning Teams Analysis
- Toss Decision Analysis
- Season-wise Match Analysis
- Venue Analysis
- Player of Match Analysis

How to Run the Project

- Step 1: Install required libraries using: `pip install streamlit pandas plotly`
- Step 2: Run the Streamlit app using: `streamlit run app.py`

Project Structure

- app.py
- matches.csv
- README.md
